Profile

As a Full Stack Web Developer who just started my career, I gained experience in developing applications from scratch in various projects. As a freelancer, I focused on improving the user experience by providing solutions to different sectors. I adapt quickly to new technologies and adopt a product-oriented approach. I am prone to teamwork and eager to learn, I aim to achieve efficient results by focusing on continuous improvement.

Education

Anadolu University, Open Education - Management Information Systems   03/2024 – present

Eskisehir Osmangazi University, ,Computer Programming / GPA 3.67 / 4   10/2021 – 09/2023

Professional Experience

Fullstack Developer, Freelance   04/2024 – present
- Using modern software tools and programming languages effectively, I create web applications that prioritize customer satisfaction with customized projects in both frontend and backend development processes.

UI Developer Intern, Jotform   07/2023 – 08/2023
                Remote
- I worked as an interface developer on an AI-based assistant project that provides support to Jotform users in a question-and-answer format. I was part of a team of interns and converted the interfaces created by the designer in Figma into code.
- Within the scope of the project, I developed a user-friendly and interactive interface using React, so that users can easily submit their questions and get quick answers from the AI-powered assistant.

Projects

Next.js E-commerce, https://ecommerce.mustafakole.dev/ ⧉
A full-stack e-commerce application being developed with Next.js. I continue to develop it using modern technologies like Prisma, MongoDB, NextAuth and TanStack Query

Next.js Blog, https://mkole.vercel.app/ ⧉
I used App Router for page routing and I used the OAuth authentication feature of the Auth.js library for user authentication. I also used CSS modules, Prisma, and MongoDB

PHP Blog, https://github.com/kmustafa0/blogWeb ⧉
It's a blog site that I built on a Bootstrap ready theme, using PHP and MySQL database. Users can sign up and comment on posts. From the admin panel, admins can share posts, edit and delete shared posts, view and delete comments, view and modify existing users, and read messages sent from the contact page.

C# Admin Panel, https://github.com/kmustafa0/AkademiFitness_admin-panel ⧉
An admin panel I created for a gym, using MySQL database to store members' information

Skills

HTML | CSS | JavaScript | PHP | MySQL | React | Next.js | MongoDB | Prisma
